

Which earthquake was the most catastrophic: Haiti 2021 or Taiwan 2024?

End of Enquiry Learning:

- I know that some areas of the world are at risk from earthquakes.
- I know where Haiti and Taiwan are and why they are at risk from earthquakes.
- I know ways in which action has been taken to limit damage from earthquakes.
- I know how to record, review, and interpret data about different places.
- I can use a topographical map to locate places at risk from earthquakes.
- I can use an atlas to locate countries and to find information.
- I can suggest sources of evidence to help me find answers.
- I can talk about the challenges facing different regions.

Taiwan 2024

Haiti 2021

Geography learning organiser Year 4
